Nida

Mern stack developer

nidaayubnida@gmail.com 03039920180 Pakistan https://www.linkedin.com/in/nidaayub

https://github.com/NIDA-Ayoub

SUMMARY

Computer Science undergraduate (BSCS, CGPA 3.87/4.00) with hands-on experience building full-stack web applications using React.js, Node.js, Express.js, and MongoDB (MERN stack).

Experienced designing RESTful APIs, JWT-based authentication, and CRUD-driven applications across three independently built production-style projects. Comfortable with Git/GitHub workflows and CI/CD basics. Seeking a Software Engineering or Full-Stack Development internship to contribute to production codebases and grow as an engineer.

EDUCATION

BSCS 09/2023 – 09/2027
Arid institute of management science Lahore Lahore Pakistan
CGPA 3.87/4.00

SKILLS

Language
JavaScript (ES6+), HTML5, CSS3

Backend
Node.js, Express.js, RESTful API Design, MVC Architecture

Tools & Practices
Git, GitHub, Docker, Postman, VS Code, CI/CD basics, Agile/Version Control workflows

Frontend
React.js, Context API, Tailwind CSS, Bootstrap, Responsive Design

Database
MongoDB, Mongoose

Auth & Security
JWT, bcrypt.js, Role-Based Access Control

INDEPENDENT PROJECTS

Smart Disaster Management System
MERN Stack | React.js, Node.js, Express.js, MongoDB, JWT
- Built a full-stack disaster-response platform with role-based access control for admins, volunteers, and citizens, managing 4 distinct data models (reports, shelters, volunteers, alerts)
- Designed and implemented secure REST APIs for incident reporting, shelter tracking, volunteer coordination, and real-time emergency alerts.
- Built an admin dashboard for monitoring active disaster reports and managing user/volunteer records.

MERN Blog Website
MERN Stack | React.js, Node.js, Express.js, MongoDB, JWT
- Developed a full-stack blogging platform with secure authentication and category-based content organization.
- Implemented complete CRUD functionality for post creation, editing, and deletion with protected routes for authenticated authors.
- Structured backend with MVC architecture to keep routes, controllers, and models maintainable and testable.

MERN E-commerce Website
- Designed and built a responsive e-commerce web application using the MERN stack.
- Implemented product listings, categories, shopping cart, wishlist, product details, and user authentication.

AI Chatbot | Taily API, JavaScript, REST API
- Built a simple AI chatbot using the Taily API and API key authentication.
- Implemented tool calling for dynamic, task-oriented chatbot interactions.
